

WINTER PARKING RULES

Simple Facts

- **November 1 - April 1** Every Year
- **Even Dates = Even Side** of the Street
- **Odd Dates = Odd Side** of the Street
- Starting at **2 AM** Every Night
- **\$15 Fine** for Violations (increases if not paid)

City crews routinely work during nighttime hours to maintain the city street. Calendar parking procedures allow the city trucks to plow more effectively and efficiently when streets are unobstructed. Vehicles that become snowed in usually get towed to promote free flow of traffic.

Every winter starting November 1st, cars are required to park on a certain side of the street overnight. On even dates, cars should park on the even side of the street/avenue. On odd dates, cars should park on the odd side of the street/avenue. Enforcement usually begins around 2:00 A.M. Therefore, you should park your car for the date at midnight. As an example, if you park your car at 10 P.M. on January 10, you should park your car on the odd side of the street/avenue since midnight becomes January 11 (an odd date). You can tell which side is odd or even by checking the house addresses. Fines for violations of calendar parking are \$15.00. They increase if not paid or contested in a timely manner.
