FS= Full Sun, SS = Sun, Partial Shade, US = United States, EA = Eurasia					
Trees to Avoid Planting Near Your House					
Some species of trees that do well in large open areas are not well suited for growing near houses or in confined spaces. The species listed below all exhibit similar characteristics of shedding a lot of debris, fast growers that have brittle branches, large trees that can outgrow the available space and form surface roots that make lawn mowing difficult. The following is a list of trees to avoid planting in the City:					
Box elder (<i>Acer negundo</i>)	White poplar (<i>Populus alba</i>)				
Silver maple (<i>Acer saccharinum</i>)	Weeping willow (<i>Salix babylonica</i>)				
Norway maple (<i>Acer platanoides</i>)	Siberian elm (<i>Ulmus pumila</i>)				
Cottonwood (<i>Populus deltoides</i>)	Amur cork (<i>Phellodendron amurense</i>)				
 The seal of the City of Menomonie, featuring a circular design with the city's name and the year 1882.
